Summary of Highlights, ICS, 1993/94

* Submitted 43 proposals to: American Chemical Society-Petroleum Research Fund, Electric Power Research Institute, DOE, Texas A & M, LLNL, NRC, NSF, USC, and USGS totaling $4,652,245.

* Administered 39 awards from 12 agencies totaling $4,368,552 including 22 new awards and $1,853,961 in new funding for fiscal year 1993/94.

* Submitted 28 scientific papers for publication to 19 journals and publishers.

* Presented papers at the fall national meeting of the Geological Society of America, the American Geophysical Union and the Spring meeting of the Seismological Society of America.

* Bruce Luyendyk and colleagues organized and presented papers at the western Transverse Ranges Symposium at the Pacific Section, American Association of Petroleum Geologists meeting in April.

* Sponsored 7 seminars held at the Hollister Research Center.

* Responded to the Northridge Earthquake, January 17, 1994 with deployment of portable seismometers and numerous interviews with television, radio, and newspapers.

* Drilled 520 meter hole into granite in Garner Valley for installation of downhole seismographs and ground water pressure monitors.

* Appointment of 8 new science staff.

* Nine undergraduate researchers participated on geodetic surveys in the Grand Teton with Art Sylvester.

* Eric McWayne, ICS undergraduate researcher, received the Van Covering award of the Pacific Section, American Association of Petroleum Geologists.

* Eric McWayne and Geoff Ely were awarded SCEC undergraduate research internships.

* Installed CUBE earthquake monitoring system at Bishop High School.

* Ralph Archuleta elected Vice President of the Seismological Society of America.
* Held our annual picnic in September at Goleta Beach Park.

* Hosted long-term visit of Dr. Jean Pierre Gratier, Professor of Physics, Université de Joseph Fourier, Grenoble, France.

* Began planning for relocation from the Hollister Research Center to Girvetz Hall on campus.
